Why buy a stubby little 25-foot element that isn't resonant on any more bands than a 17-foot element, when you can get a great price on the original 34′ 6″ telescopic element and shorten it to 25-feet if you want? The only difference between the new and the NOS version are the threads on the NOS were manually tapped for 3/8 24 and the new versions were tapped by our Lathe.

!!NOT FOR USE WITH THE HEXTENNA!!

2-40M, 34′ 6″ Telescopic Antenna Kit (SS34+NOS)

Pro Tip

SS34+ Pro-tip: For longer-term deployments use one each these at the bottom of the first ten sections. This will keep the whip from shrinking overnight, for example. CLICK HERE

2-40M, 34' 6" Telescopic Antenna Kit (SS34+NOS)

Verified review - view original

Great quality, fast shipment, works great – substantially longer and less expensive than other available telescopic antennas.

2-40M, 34' 6" Telescopic Antenna Kit (SS34+NOS)

Verified review - view original

There is nothing like this 34 foot beast anywhere and I purchased 2 of them. Use it at approximately 1/2 height for a very sturdy 20 meter whip or with guy ropes as instructed for 40 meters
