6-80M MIL EmComm Deluxe Antenna

Verified review - view original

This is my first Alpha Antenna. I found myself needing an easily deployable antenna that is ADA compliant. This antenna meets all my expectations and works well. I can easily operate wheelchair/rollator/patio portable now.

I had a 1.1:1 match on 20m with my KX2 today using only the short ground wire. Great company with a great product. I would highly recommend. Thank you Steve.

6-80M MIL EmComm Deluxe Antenna

First I am impressed with the total quality of the entire package. It is built to withstand the elements. Second the operation is effortless and if the bands would behave (which is no fault of the equipment) I would be a happy camper. I am using the antenna in my fenced in back yard as a semi permanent installation. I do not want towers ect not due to HOA I have none but my preference . So bottom line I highly recommend!!!

This antenna and tripod together are wonderful. It is easy to set up and take down, and the field flexibility is out of this world. It is phenomenal, and I just wish I could have obtained it sooner.
