

VHF UHF plus 6-meter antenna add-on element for the Alpha Antenna HF [MagLoop](#). This enables you to add 6 meters, 2 Meters, and 440 MHz to the [10-40 Meter MagLoop available here](#).

This optional element adds a VHF/UHF plus 6-meter capacity to your antenna. It is fast and easy to install and takes up little additional space in your base or portable bag. NOTE – The system operates independently for either 10-40M or 6/2/70cm by changing the elements.

*Designed to work with our post-January 2017 version Magnetic Loop Antenna.
