

TM-705 Tripod Mount

This Tripod Mount (TM-705) for the Icom AL-705 antenna will fit on any tripod with a 1/4 20 male thread. On the other side are two screws that fit into the tabs which came with your antenna, that you must first install on the tuning box of the AL-705.

This tripod mount, or TM-705, has been designed in Fusion 360, and takes 4 hours for our equipment to build. Each thermoplastic polyester unit is then finished off by hand with a milled aluminum adapter, which will fit on any tripod with a 1/4 20 male thread. On the other side are two holes that are especially formed with a tap that provide a perfect fit for the two stainless steel screws that supports the Icom AL705 antenna.

NOTE - When you received your Icom AL-705 antenna you received the following AL-705 Parts Bag, which you will need for installation of this item.

Perfect fit. VERY HIGH quality construction. As always, fast delivery and a fair price. AMERICAN MADE...that's the icing on the cake.

Just the thing to mount my Mag Loop on the tripod. Simple bit of kit. Brilliant design.
