The Magnetic Loop Booster Cable can be used on the portable Alpha Loop, Model 100W.
– When installed on the Model 100W Alpha Loop you may:

1. Use just the longer Booster Cable in lieu of the shorter Default Outer Loop for to increase efficiency by approximately 20% on 12-40M at 75W PEP SSB, 35W CW, or 15W Digital. To see more, Click Here for the tuned results while using the Default Outer Loop, and compare those by Clicking Here for the tuned results while using the longer Booster cable.
2. You may also add the Booster Cable as a double loop to form an outer loop that is over 21 feet in total length, which increases skin effect thereby increasing efficiency on 40-80M at 20W PEP SSB, 10 Watts CW, and 5 Watts Digital.
