The MIL 2.0 AutoMatch is for building various HF antennas using elements from Alpha Antenna.

Including:

1. 60-foot end-fed wire antenna for tuner free operations from 10-80 meters,
2. HexTenna Delta Loop, or
3. A combination of (1) Vertical element (minimum 9’4″ recommended) where a single 25′ wire element would attach and slope out and away from the match. Plus, one 8′ grounded counterpoise that would attach to the bottom bolt of the match, which would be deployed in the opposite direction as the 25′ wire element.

Specifications

Female 3/8 24 Hex Nut is on top and a 3/8 34 Bolt is on the bottom, where a SO239 Adapter is fixed for attachment of your coax.
