Product Overview

Gutters are HUGE antennas, transform them into a tuner-free stealth HF and easy-to-use VHF, UHF, GMRS, and CB antenna.

Key Specifications

Specification	Details
Frequency	10-80M (29.7-3.5 MHz), 2M, CB, GMRS, 440 & 900 MHz
Power	250W PEP SSB; 125W CW; 25W Digital/AM/FM
RF connection	SO-239
Weight	3 lb
Shipping size	12 x 9 x 4 in

Best For

- HOA/stealth base installations
- Operators who can use conductive metal gutters/downspouts and real dirt ground
- HF/VHF/UHF/GMRS/CB multi-service use

What’s Included

- HOA Buster matching network in selected color
- Ground spike and mount
- 8-foot jumper wire
- * NOTE – You can request a custom length for the jumper wire, but it must be at least 18 inches and no more than 10 feet. * When checking out, simply add a note in the Comment field with your desired length.

Setup and Operation

Takes just 90 seconds to install!

1. Push the included Mounting Spike into the ground.
2. Extend the jumper wire between the Match and downspout, keeping it off the

ground, and secure it with the included clip at the bottom of your downspout.
3. Then attach any length of coax to the connector on the bottom of the AutoMatch and run your coax to your equipment.

Technical Data

Typical SWR readings that provide tuner-free operations.

Options and Compatible Accessories

Optional 60-foot end-fed element enables portable/base operation without a gutter.

10-80M HF, UHF, and VHF HOA Buster gutter antenna

Verified review - view original

I moved into a restrictive HOA in Hawaii. It’s already challenging living on an island where “everywhere is DX for us” , but the HOA rules make it nearly impossible to get an effective antenna up. I installed the HOA Buster and wow! I was admittedly skeptical, but it works surprisingly well! After I found a good spot where the downspout was at the end of the run, I hooked things up, then went around my gutters with self tapping screws and ensured good connectivity between segments. Well over 100ft of gutter is in play, and I’m able to tune 10-160m and it works! Even with TechShield (metal w/ insulation) installed in the adjacent roof, everything still tunes and performs well! The HOA Buster has rescued my hobby!

10-80M HF, UHF, and VHF HOA Buster gutter antenna

Verified review - view original

I am a first time customer to Alpha. Prior to my purchase I had several technical questions on the HOA Buster. My email questions were promptly answered and when my order was shipped I was given a heads up. I was very pleased with their customer service.

10-80M HF, UHF, and VHF HOA Buster gutter antenna

Verified review - view original

Very pleased with the antenna! Was able to set it up in about 30 minutes (most of that was finding an appropriate patch cable. Signed into a early NTS net, fine business!
