 Verified review - [view original](#) 

Great product but doesn't fit my car. My solution is to buy a car it will fit. Just kidding about buying a car.

I have the mobil mount on another car and fits just right. I'll make it work my present car.

The Jam Mount is a solid mount, but not always the best mount, at least for my Subaru Outback Sport. It did provide a solid body ground for the antenna, but it wasn't the best option for my car. Otherwise, stainless steel is a great choice!

The product was exactly what they said and worked perfect.  
Very happy working with these guys.
