The SS34+ Bolt enables the **2-40M VHF HF, SS34+** to be deployed on our **Survivor Tripod Mount** using our **Survivor Tripod**.

TO BUILD THE BOLT: The 316 stainless steel SS34+ Bolt has 3/8 24 threads, a shaft that is 2.5 inches long, and a head that is .55 inches in diameter and .25 inches thick. The bolt will include a 1.4 inch length of adhesive marine shrink tubing on the shaft just under the bolt head, which enables the top of mast mount to securely hold everything in place.
