

This mount with an SO239 connection is made to support the SS34+ Telescopic Whip, which screws into the mount when it is deployed with the SS34+ Guying Kit.

[CLICK HERE FOR THE USER GUIDE](#)

For raised deployments, as is shown in the above User Guide, our mount moves the stress to the large base of the 34'6" Element, and the SS34+ Bolt is used on our Survivor Tripod & Adapter.

We Listen

We are dedicated to improving all of our [Portable VHF UHF HF Antennas](#). Specifications and descriptions are subject to change without notice.

Could not ask for any better service. Awesome ☐ product. Set it up and made some connections on the bands. Will recommend your company to others.
