Hextenna hub awesome! I own another and liked it so much i got a second one. I use it as part of my array tuning one hub longer and then grounding out. Top quality product and i am able to make many contacts with.

Hi Steve

First, I thank you for the price reduction.

I have used this antenna for some years now. Unfortunately I broke the mounting lug partly out of the hub. I was able to repair it.

But the new model appears to be more robust.

This is my go to POTA antenna. I mostly use it in vertical configuration. Works globally.

Last time we spoke you told me that any additional parts for Yagi configuration were not possible. As add on to the Hextenna.

Anyway very satisfied with products and service.

Thanks Steve

F.Scott Bauer
